

---

THE DISTANCE BETWEEN TRAUMA  
AND TREATMENT JUST GOT 35 MINUTES SHORTER.

---

**Danville, Kentucky now has its  
very own Level III Trauma Center.  
So, what does that mean to you?**

It means optimal trauma care is right here – in your neighborhood. It also means you're just minutes from one of only two hospitals in the state with the Level III designation. Although we hope you'll never need this level of care, we couldn't be more proud to have the right people and the right equipment in place just in case you do. Take good care of yourself, Danville. We'll be right here the second you need us.
