

Speaker 1: Hi, I'm Dan McKay, CEO and President of Ephraim McDowell Health. During the month of November, I have decided to participate in No Shave November, and I encourage you all to do the same. It'll be an opportunity to bring awareness and support to men's health. Oftentimes, men ignore their own health and this will be a good opportunity to make sure that we can bring awareness to these issues, encourage men to go through the screenings and do a lot of things that are preventative, preventive medicine, preventive screens, and get treated. We also have physicians on our website that participate in screenings. Go visit your family doctor and take care of your health.

By participating in No Shave November, people will ask you why the whiskers all of a sudden, and it will be your chance to explain and bring awareness and encourage people, encourage the men in your life, to get screened, to be aggressive with their own health, which oftentimes they ignore.

If you would like to support local cancer initiatives, please visit Ephraim McDowell Health Foundation's website and make a donation. So again, please participate in No Shave November. Let's bring more awareness, encourage the men in our lives to be proactive with their health.
