

Brennan Royalty: My name is Brennan Royalty. I work at Danville Family Practice. I've been here about two years.

I am from Kentucky. I've moved around a bit growing up. I spent most of my years in Lexington, Kentucky.

I like to fish and I like to exercise.

I thought the human body was the most interesting machine out there and wanted to be able to help people.

Probably go back to engineering, which is what I did before I was a physician.

I did undergraduate and med school at the University of Kentucky.

I chose family practice because it addresses a little bit of everything with people's health. I also wanted to do some emergency medicine work and I wanted to complete a sports medicine fellowship, so family medicine gave me a route to do that.

All encompassing. We treat kids, adults. We do acute issues. We do long term chronic care as well. So just about anything that needs to be addressed, we can take care of for you.

Feeling like you've helped somebody when they were really in a bad situation with their health and they needed some guidance and some reassurance about where they are.
